The Ehlers-Danlos Support UK

The Ehlers-Danlos Support UK (registered charity number 1157027) improves quality of life for people living with EDS and HSD. We are the largest UK charity exclusively working across the UK to represent support, advise and inform those living with the conditions and the medical professionals working with them.

The Ehlers-Danlos syndromes (EDS) and hypermobility spectrum disorder (HSD)

The Ehlers-Danlos syndromes (EDS) are a group of 13 individual genetic conditions, which affect the body's connective tissue. HSD has similar symptoms to the most common type of EDS. People with EDS and HSD tend to experience a broad range of symptoms including long-term pain, very loose joints which dislocate easily, chronic fatigue, dizziness, palpitations and digestive disorders. These are complex syndromes affecting many systems of the body at once – despite this EDS and HSD are often invisible disabilities.

13 for 13

1 in 500 people is living with one of the 13 different types of EDS in the UK today. That's why we're asking our supporters to do 13 for 13 this October. With their help we can confront misunderstanding, challenge inequality and raise funds to support people affected by EDS and HSD. Find out more: www.thirteen.ehlers-danlos.org
